

NTS Announces the Acquisition of EMC Integrity

Adds a Twelfth EMI / EMC Testing Laboratory to NTS' Market Leading Position, Allowing NTS to Locally Serve Clients in the Rocky Mountain Region

Calabasas, CA and Longmont, CO (December 23, 2015). National Technical Systems, Inc. ("NTS"), the leading independent provider of environmental simulation testing, inspection, and certification solutions in the United States, announced today that it has acquired EMC Integrity ("EMCI") of Longmont, Colorado. Financial details of the acquisition were not disclosed.

Founded in 1994, EMC Integrity, which will become NTS Longmont, operates a 17,000 square foot, state-of-the-art emissions and immunity testing facility that offers ample land for expansion and is centrally located between Denver, Boulder, and Ft. Collins, Colorado. EMC Integrity's two fully accredited 10-meter chambers represent a regional best-in-class capability that NTS plans to extend with additional capital and personnel investments to serve EMCI's world-class customers in the information technology, medical, aerospace, and commercial markets.

NTS Longmont is the twelfth NTS laboratory offering EMI / EMC emissions, immunity, and mitigation testing services in the United States and adds an important geographic location that further supports NTS' nationwide coverage. Additionally, as a CB Testing Laboratory ("CBTL"), NTS Longmont allows NTS to expand the services it currently offers to the medical device market.

"We are excited to add a Rocky Mountain location to the NTS network, enhancing our ability to serve our clients in the region, and we look forward to expanding EMCI's capabilities to drive future growth," noted William C. McGinnis, CEO of NTS. McGinnis added, "Local access, cutting-edge capabilities, and schedule availability have all been part of a successful acquisition strategy, which has allowed us to add eight new testing locations over the last two years in furtherance of our goal to provide our industry-leading environmental simulation testing capabilities on a nationwide basis."

Vince Greb, founder of EMC Integrity, added, "EMCI has a great reputation in the local market that, when combined with NTS' respected national brand, will allow NTS Longmont to enter its next phase of growth. Our folks are very excited to be part of the NTS team, and we look forward to further investing in our local capabilities to serve our clients and all of their EMI / EMC and other testing needs."

NTS is a portfolio company of Los Angeles-based Aurora Capital Group.

About National Technical Systems

National Technical Systems, Inc. (NTS) is a global independent provider of environmental simulation testing, inspection, and certification services, serving a broad range of industries, including the civil aviation, space, defense, nuclear, telecommunications, industrial, electronics, medical, and automotive end markets. During its more than 50 years in business, NTS has built the broadest geographic presence and sole national footprint in the United States, an unparalleled breadth of capabilities, and has fostered continuous innovation, making NTS a unique one-stop resource to meet its clients' demanding and evolving requirements. Operating through a network of over 25 technologically advanced testing laboratories across the United States, this geographically diverse footprint puts NTS facilities in close proximity to its more than 4,000 clients, allowing NTS to serve the nation's most innovative companies with industry-leading accessibility and responsiveness. NTS' offering spans more than 70 distinct environmental simulation and materials testing categories, including climatic, structural, dynamics, fluid flow, EMI/EMC, lightning, product safety, acoustics, failure analysis, chemical, and other industry-specific tests, allowing it to handle its clients' most demanding needs. Additionally, the company is accredited by numerous national and international organizations, which allows NTS to have its test data nearly universally accepted worldwide. NTS operates its inspection division under the Unitek brand, providing a wide range of supply chain management services. NTS' certification division, which operates under the NQA brand, is one of the largest and most respected global ISO

registrars, with active certifications in more than 75 countries. For additional information about NTS, visit our website at www.nts.com or call 800-270-2516.
